

# Muhammet Banzaroğlu

## Software Engineer & Frontend Engineer

Successful Full-Stack Developer focused on meeting objectives with innovative applications and clean code. Knowledgeable about feature implementation and debugging, and skilled at creating detailed documentation to ensure knowledge transfer and project clarity. A concise and thoughtful communicator who maintains fast, proactive communication and adapts quickly to company culture, collaborating easily with both technical and non-technical personnel.

For more details about me and my work feel free to visit: [muhammettbanzaroglu.com](https://muhammettbanzaroglu.com).

### Experiences

**Frontend Developer** Delege AI June 2025 - Present

- Implemented modular style management through Tailwind CSS and Material-UI integration for scalable design systems
- Developed and integrated new screens and user interfaces to enhance application functionality and user experience
- Managed service implementations and maintenance, ensuring reliable API integrations and optimized data flow

**FullStack Developer** Ziraat Technology Sept 2024 - June 2025

- Developed scalable, performance-focused web applications using React.js and built dynamic and reusable frontend components
- Implemented state management with Redux and Context API and integrated frontend with backend via RESTful APIs

**Founding Board Member** itüöder (ITU Student Assoc.) Sep 2024 - Present

- Owing to the knowledge and insights gathered from arı24, we have formed an association with an eight-member board made up of former and present students.
- The goals of this group are to uphold Istanbul Technical University's spirit and address problems encountered by both graduates and students.

**Intern / ABAP Developer** NTT Data BS Jul 2024 - Sept 2024

- Developed backend algorithms in ABAP using SAP GUI and Eclipse by defining tables and writing SQL-based functions based on customer orders
- Utilized ABAP's object-oriented structure with integrated SQL to combine OOP principles and database operations effectively.

**Intern / Software Engineer** Senkron Software Jan 2023 - March 2023

- Developed a full-stack project using SQL (database), Angular (frontend), and Java (backend).
- Collaborated effectively as a team of two interns, each contributing to separate modules.

**Intern / Software Engineer** Garanti Technology Jul 2021 - Sept 2021

- Completed comprehensive training programs in customer relations, human resources, Agile methodologies, and resilience development within the banking environment
- Successfully finalized all assigned software training modules, enhancing both technical and interpersonal skill sets

### Technologies

**Frontend:** React.js, Angular, TypeScript, Tailwind CSS, MUI, Next.js, Radix UI, Shadcn

**Backend:** .NET, C, C++, Flask, Node.js, SQL (MySQL, PostgreSQL), RESTful APIs, Python

**Tools & Libraries:** Git, Docker, Redux, Context API, Postman, Figma, LangChain, Swagger

### Education

**İstanbul Technical University**

Computer Engineering, 3.00 GPA  
2020 - 2025

**University of West Attica**

Computer Science - Erasmus  
Feb 2023- July 2023

### Skills

- Clear Knowledge Organization
- Bridging Tech and Business
- System-Level Thinking
- Responsive Communication
- Persistent Documentation Habit
- Smart Channel Selection
- Genuine User-Centered Thinking
